The giants of the clouds is best how to describe these beings.

They dwell within the skies and thus have the natural ability of flight. With size comes power, as Cloud Giants have unreal physical powers of damage which, at various times during battle, are seen. Cloud Giants are stronger than their brother race, the Frost Giant, but lack their counterpart's intellectual powers.

Giants in general have the ability to sometimes ignore incoming physical attacks, due to their immense size, or resist a certain amount of incoming damage to their physical self. Giants of the Clouds are clearly much more resistant to lightning based attacks, since their natural habitat is in constant contact with storms. Clearly giants, in general, are very powerful, but increase in power at a slow rate. They advance in levels at a moderate rate but have greatness beyond what simple beings could normally ascertain.
