---

- Silver inferno has been reduced in power, and it is no longer a subclass ability (it is available to all major remort marauders). It no longer avoids group members, and the buff is strongly dependent on the number of targets struck.
- New firebrand ability: eruptive stigma.
- Uearthly rapture can now absorb all attack types, even those that normally could not be counterattacked (big buff =)).
- Jakaen fire, frost, and lightning immunities are now 50%.
- Counterattacks now behave according to their damage types (they are now affected by vulnerabilities, resistances, etc.)
- All healing effects are now affected by healing amplification. (Natural hp regeneration per tick is not a healing effect.)
- Special room effects (such as trewans or monk exits) will no longer bar PKers from entering the room.
