- **Unenhance has been removed from Nodeka.**

- Archer-shoot, shoot and rogue-shoot now have benefits for over 100% training.

The order of overall power is as follows:

archer-shoot - most powerful

shoot - more powerful

rogue-shoot - powerful

We believe archer-shoot should be the most powerful, since the entire shadow archer subclass is based on the ability of shooting. Second, we believe hunters are meant to be good with bows, so their ability should be second in power. Finally, rogues should be good archers, just not as good as hunters.
